Automated decision-making means that a decision which is likely to have legal effects or similarly significant effects on Users, is taken solely by technological means, without any human intervention. Checkboard may use the Users' Personal Data to make decisions entirely or partially based on automated processes according to the purposes outlined in this document. Checkboard adopts automated decision-making processes as far as necessary to enter into or perform a contract between Users and Owner, or on the basis of the Users' explicit consent, where such consent is required by the law.

Automated decisions are made by technological means – mostly based on algorithms subject to predefined criteria – which may also be provided by third parties.

The rationale behind automated decision-making is:
